Report on possible mistakes on review list circulated earlier

Subject: Report on possible mistakes on review list circulated earlier

Chris Salotti, our Leg Counsel, just called. He was contacted by a CRS researcher who claimed there were mistakes in a monument review list DOI or the Administration circulated previously, perhaps as background to the EO announcement - she was not clear on that to Chris.

She wanted to talk to someone. While I think returning that call is premature. I wanted to alert you to the possible problem.

The issues apparently involved 2 Forest Service-involved monuments - 1 on the list that perhaps shouldn't have been, and vice versa. I had downloaded all of the recent Proclamations and have the citations for the others, so will check all those against our list tonight, from home.

Was there a list that was circulated outside the building? If so, could I get a copy?

Subject: Re: Report on possible mistakes on review list circulated earlier

There was a list but it was a rough list thrown together for press briefings background. It is not accurate. It does not include Cascade Siskyou and still includes the NPS one. I think this will be quashed once we do a fed reg. But I would be curious which ones CRS is referring to.

Monument	Location	Year	Acreage
Papahānaumokuākea Marine National Monument	Pacific Ocean	2006/2016	89,600,000.00
Marianas Trench Marine National Monument	Pacific Ocean	2009	60,938,240.00

San Gabriel Mountains seems to be the inappropriately omitted one. I stopped by Chris' office on the way out and he said that was what she was focused on. It was established 2014, 346,177 acres. I will add it to our list and recirculate that list once I re-check all the others.

San Gabriel is not in the PMB data call list. I had it from the list I downloaded from an NPS web site that supposedly lists all Monuments up to the NE Seamounts.

Although I don't believe it could be finished in time to be used for the FR notice and press release, perhaps I should ask Amy to have them tell whomever reported from each bureau to urgently recheck their data.

Well maybe we just should list the monuments if we are not confident. I think the key is getting this out.

I am reasonably confident we have what we need insofar as the list is concerned - I have cross-checked against 2 other Monument data-bases. I was thinking of the PMB recheck as a means of letting those submitting the data know that they messed up without making a big deal about it, not as something that would turn up other omissions.

If Amy agrees to let us use their Regs.gov expert, and SOL doesn't have any problems with us using it, we should be able to finalize the notice and press release tomorrow. Unfortunately, OCL has not collected the names of the Representatives with the Monuments in their District, but Micah agreed tonight that I could ask the bureau CL offices to provide those, and I will ask for those by COB Friday, so we should be able to send the notice to the FR Monday and send advance notice to the Hill then also, with public release Tuesday (it takes at least a day after a notice is delivered before it is published, but it can be viewed I believe the next day; will confirm that tomorrow).

If we don't use Regs.gov it could get very expensive - Larry said he has already gotten comments that have used up a good part of his May capacity. This is provided by one of the telecoms - ATT perhaps, once he suggested Regs.gov I didn't retain the other details - under contract, and there are limits on how many items are handled per amount paid.

Chris Salotti, our Leg Counsel, just called. He was contacted by a CRS researcher who claimed there were mistakes in a monument review list DOI or the Administration circulated previously, perhaps as background to the EO announcement - she was not clear on that to Chris.

She wanted to talk to someone. While I think returning that call is premature. I wanted to alert you to the possible problem.

The issues apparently involved 2 Forest Service-involved monuments - 1 on the list that perhaps shouldn't have been, and vice versa. I had downloaded all of the recent Proclamations and have the citations for the others, so will check all those against our list tonight, from home.

Was there a list that was circulated outside the building? If so, could I get a copy?

I am reasonably confident we have what we need insofar as the list is concerned - I have cross-checked against 2 other Monument data-bases. I was thinking of the PMB recheck as a means of letting those submitting the data know that they messed up without making a big deal about it, not as something that would turn up other omissions.

If Amy agrees to let us use their Regs.gov expert, and SOL doesn't have any problems with us using it, we should be able to finalize the notice and press release tomorrow. Unfortunately, OCL has not collected the names of the Representatives with the Monuments in their District, but Micah agreed tonight that I could ask the bureau CL offices to provide those, and I will ask for those by COB Friday, so we should be able to send the notice to the FR Monday and send advance notice to the Hill then also, with public release Tuesday (it takes at least a day after a notice is delivered before it is published, but it can be viewed I believe the next day; will confirm that tomorrow).

If we don't use Regs.gov it could get very expensive - Larry said he has already gotten comments that have used up a good part of his May capacity. This is provided by one of the telecoms - ATT perhaps, once he suggested Regs.gov I didn't retain the other details - under contract, and there are limits on how many items are handled per amount paid.

San Gabriel is not in the PMB data call list. I had it from the list I downloaded from an NPS web site that supposedly lists all Monuments up to the NE Seamounts.

Although I don't believe it could be finished in time to be used for the FR notice and press release, perhaps I should ask Amy to have them tell whomever reported from each bureau to urgently recheck their data.

There was a list but it was a rough list thrown together for press briefings background. It is not accurate. It does not include Cascade Siskyou and still includes the NPS one. I think this will be quashed once we do a fed reg. But I would be curious which ones CRS is referring to.

Monument	Location	Year	Acreage
Papahānaumokuākea Marine National Monument	Pacific Ocean	2006/2016	89,600,000.00

As an additional check I will ask Chris Salotti to call the CRS person back, say he is checking on her question and wants to confirm that it was - why was Giant Sequoia included and San Gabriel Mountains excluded from WH list. Presuming that is correct, he can tell we we plan to issue a list as part of request for public comment and San Gabriel is on it. That should both calm her down and give us information on anything else she thinks is missing.

I don't want to call her myself as no confidence she would not then circulate my name, and while that is unavoidable in the long run would like to keep as much time free of outside calls as possible,
